```java
@Autowired
private DataSourceTransactionManager transactionManager;

DefaultTransactionDefinition defaultTransactionDefinition = new DefaultTransactionDefinition();
defaultTransactionDefinition.setPropagationBehavior(TransactionDefinition.PROPAGATION_REQUIRES_NEW);
TransactionStatus transaction = transactionManager.getTransaction(defaultTransactionDefinition);
try {
    transactionManager.commit(transaction);
} catch (Exception e) {
    transactionManager.rollback(transaction);
    throw new RuntimeException(e);
}
```
